

"AT&T Comcast is fully committed to negotiating mutually beneficial service agreements with Internet service providers ("ISPs") so that its cable customers will have a choice of ISPs,"

I contacted Comcast and wish to pay only for broadband cable access without having to pay for Comcast's ISP. I received the following two messages:

1. "Thank you for contacting Comcast Cable. Unfortunately, we currently do not offer this product. Right now, Comcast is your ISP as well. You can run any ISP through our service, however, the cost is the same. Thank you for choosing Comcast."

2.  
"Dear David,  
We have received your e-mail and I will be happy to assist you.  
Currently this is not an option."

The Republican controlled FCC is failing in its responsibility to the consumer in providing fairly priced Internet access.  
George Bush "Pioneer" Stephen Burke, president of Comcast Cable, committed \$100,000 to the Bush 2004 re-election campaign.  
The FCC favoritism to Comcast is blatant pay back!

Do the job you are appointed and paid to do.....service to the American public!  
Not to special interests who pay \$100,000 bribes!
